

**Form (H)**  
**Short course description**

Course title: <b>Quality control</b>	Course number and code: <b>STAT 423</b>
Previous course requirement: <b>STAT 332</b>	Language of the course: English
Course level: <b>8 / Year 4</b>	Effective hours: 2(2+0+0)

**Course description**

<p>Quality control definition and basic concepts, Quality improvement, PDSA cycle  The general theory of control charts, Variables control charts, The Control charts for attributes, The <math>p</math> and <math>np</math> charts, The Control Chart for Nonconformities, The <math>c</math> and <math>u</math> charts, OTHER VARIABLE CONTROL CHARTS, Individual and moving-range charts  Acceptance of sampling, Some sampling plans, Economic Design of Control Charts  Average Outgoing Quality (AOQ), Average Outgoing Quality Limit, OC curve</p>
---

**Course objectives**

<ul style="list-style-type: none"> <li>• Introducing a historical introduction of quality control.</li> </ul>
<ul style="list-style-type: none"> <li>• Demonstrating its importance by discussing some quality control application.</li> </ul>
<ul style="list-style-type: none"> <li>• Introducing the development of the science of quality control.</li> </ul>
<ul style="list-style-type: none"> <li>• Introducing the desirable philosophy and properties of quality control.</li> </ul>
<ul style="list-style-type: none"> <li>• Introducing the most important concepts of Statistical Process Control (SPC).</li> </ul>
<ul style="list-style-type: none"> <li>• Introducing the applications of the concepts of SPC.</li> </ul>

Learning outcomes (understanding, knowledge, and intellectual and scientific skills)  
After studying this course, the student is expected to be able to:

<ul style="list-style-type: none"> <li>• Knowledge of the field of Quality Control.</li> </ul>
<ul style="list-style-type: none"> <li>• Knowledge of assessing production.</li> </ul>
<ul style="list-style-type: none"> <li>• Knowledge of how to apply SPC</li> </ul>
<ul style="list-style-type: none"> <li>• Knowledge of finding the best method to measure quality</li> </ul>
<ul style="list-style-type: none"> <li>• Knowledge of accepting or rejecting lots and samples.</li> </ul>
