

## The Herbarium:

The Herbarium was established in 1385 H, and was registered in the records of lawns World Service in 1409 H. It includes nearly four thousand dried plant samples from the Kingdom identified by their scientific names, tribes, the places from where they were collected and the date of collection. About (5000) types of flowering plants have been collected till now. The Herbarium, together with the Book of Flora which was authored by faculty members, represents an important reference for the Kingdom's plants.
